

Dear third grade parents,

Welcome back to a wonderful school and school year at St. Mark School.

This school year we will be learning, Religion, Math, English, Phonics, Spelling, Science, Social Studies.

We will also have Physical Education, Music, Computer, Art and Spanish.

As you can see, the school day will be full of learning and it is my hope that the students will fully participate.

I expect the third graders to keep an up to date notebook which includes class notes and definitions of key concepts and terms.

Homework generally consists of nightly study and reinforcement of the day's class, reading of the text material, review sheets and worksheets. Occasionally, there will be a long- term project.

Tests and quizzes are given throughout the quarter and will be announced before the test day.

Homework, class work and tests and quizzes are all used to calculate the student's quarter grade. Class participation is encouraged. We got off to a good start this week.

You can be supportive at home with all the above. Discuss with them what their day was like.

I'm looking forward to our working together this year in third grade as we study and prepare for a rewarding year.

Feel free to contact me through e-mail, school office or by note. I will promptly respond.

Sincerely,

Mrs. Josephine Litten
